

system approved by the NRCS State Conservationist used to rank land for farm and ranch land protection purposes, based on soil potential for agriculture, as well as social and economic factors, such as location, access to markets, and adjacent land use. (For additional information see the Farm-land Protection Policy Act rule at 7 CFR part 658.)

Landowner means a person, persons, estate, corporation, or other business or nonprofit entity having fee title ownership of farm or ranch land.

Natural Resources Conservation Service is an agency of the U.S. Department of Agriculture.

Non-governmental organization is defined as any organization that:

- (1) Is organized for, and at all times since the formation of the organization, has been operated principally for one or more of the conservation purposes specified in clause (i), (ii), (iii), or (iv) of section 170(h)(4)(A) of the Internal Revenue Code of 1986;
- (2) Is an organization described in section 501(c)(3) of that Code that is exempt from taxation under 501(a) of that Code;
- (3) Is described in section 509(a)(2) of that Code; or
- (4) Is described in section 509(a)(3) of that Code and is controlled by an organization described in section 509(a)(2) of that Code.

Other interests in land include any right in real property recognized by State law, including fee title. FRPP funds will only be used to purchase other interests in land with prior approval from the Chief.

Other productive soils are soils that are contained on farm or ranch land that is identified as farmland of State-wide or local importance and is used for the production of food, feed, fiber, forage, or oilseed crops. The appropriate State or local government agency determines Statewide or locally important farmland with concurrence from the State Conservationist. Generally, these farmlands produce high yields of crops when treated and managed according to acceptable farming methods. In some States and localities, farmlands of Statewide and local importance may include tracts of land that have been designated for agri-

culture by State law or local ordinance. 7 CFR part 657 sets forth the process for designating soils as State-wide or locally important.

Pending offer is a written bid, contract, or option extended to a landowner by an eligible entity to acquire a conservation easement before the legal title to these rights has been conveyed for the purpose of limiting non-agricultural uses of the land.

Prime and unique farmland are defined separately, as follows:

(1) Prime farmland is land that has the best combination of physical and chemical characteristics for producing food, feed, fiber, forage, oilseed, and other agricultural crops with minimum inputs of fuel, fertilizer, pesticides, and labor, without intolerable soil erosion, as determined by the Secretary.

(2) Unique farmland is land other than prime farmland that is used for the production of specific high-value food and fiber crops, as determined by the Secretary. It has the special combination of soil quality, location, growing season, and moisture supply needed to economically produce sustained high quality or high yields of specific crops when treated and managed according to acceptable farming methods. Examples of such crops include citrus, tree nuts, olives, cranberries, fruits, and vegetables. Additional information on the definition of prime, unique, or other productive soil can be found in 7 CFR part 657 and 7 CFR part 658.

Secretary is the Secretary of the U.S. Department of Agriculture.

State Technical Committee means a committee established by the Secretary of the U.S. Department of Agriculture in a State pursuant to 16 U.S.C. 3861 and 7 CFR part 610, subpart C.

State Conservationist means the NRCS employee authorized to direct and supervise NRCS activities in a State, the Caribbean Area (Puerto Rico and the Virgin Islands), or the Pacific Basin Area (Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands).

§ 1491.4 Program requirements.

(a) Under the FRPP, the Secretary, on behalf of CCC, shall purchase conservation easements, in partnership

with eligible entities, from landowners who voluntarily wish to protect their farm and ranch lands from conversion to nonagricultural uses. Eligible entities submit applications to NRCS State Offices to partner with NRCS to acquire conservation easements on farm and ranch land. NRCS enters into cooperative agreements with selected entities and provides funds for up to 50 percent of the appraised market value for the easement purchase. In return, the entity agrees to acquire, hold, manage, and enforce the easement. A Federal contingent right interest in the property must be included in each easement deed for the protection of the Federal investment.

(b) The term of all easements will be in perpetuity unless prohibited by State law.

(c) To be eligible to receive FRPP funding, an entity must meet the definition of "eligible entity" as listed in § 1491.3. In addition, eligible entities wishing to receive FRPP funds must also demonstrate:

(1) A commitment to long-term conservation of agricultural lands;

(2) A capability to acquire, manage, and enforce easements;

(3) Sufficient number of staff dedicated to monitoring and easement stewardship; and

(4) The availability of funds.

(d) Eligible land must meet the definition of "eligible land" as provided in § 1491.3. In addition:

(1) Entire farms or ranches may be enrolled in FRPP.

(2) Farms must contain at least 50 percent of prime, unique, Statewide, or locally important soil, unless otherwise determined by the State Conservationist, or contain historical or archaeological resources.

(3) Eligible lands are farm and ranch lands subject to a pending offer, as defined in § 1491.3, for purchase of a conservation easement.

(4) Eligible land must be privately owned. NRCS will not enroll land in FRPP that is owned in fee title by an agency of the United States or State or local government, or land that is already subject to an easement or deed restriction that limits the conversion of the land to nonagricultural use, un-

less otherwise determined by the Secretary.

(5) Eligible land must be owned by landowners who certify that they do not exceed the adjusted gross income limitation eligibility requirements set forth in Section 1604 of the Farm Security and Rural Investment Act of 2002.

(e) Prior to FRPP fund disbursement, the value of the conservation easement must be appraised. Appraisals shall be completed and signed by a State-certified or licensed general appraiser and shall contain a disclosure statement by the appraiser. The appraisal shall conform to either the Uniform Standards of Professional Appraisal Practices or the Uniform Appraisal Standards for Federal Land Acquisitions.

(f) At the discretion of the Chief, a standard easement or equivalent legal form, which meets the intent of the 2002 Act, will be required as a condition for program participation.

(g) The landowner shall be responsible for complying with the Highly Erodible Land and Wetland Conservation provisions of the Food Security Act of 1985, as amended, and 7 CFR part 12.

§ 1491.5 Application procedures.

(a) When funds are available, NRCS publishes a Request for Proposals in the FEDERAL REGISTER or, at the discretion of the Chief, uses another process to solicit applications from eligible entities to cooperate in the acquisition of conservation easements on farms and ranches. Information required in the application will be set forth in the Request for Proposals.

(b) To participate, an eligible entity submits a proposal to NRCS for the acquisition of conservation easements on eligible farm or ranch land, on which the entity already has pending offers. An entity's application contains a request to fund one or more parcels. All applications must be submitted to the appropriate NRCS State Conservationist by the specified date, as indicated in the Request for Proposals.

§ 1491.6 Ranking considerations and proposal selection.

(a) Once the NRCS State Conservationist has assessed entity eligibility
